Project scope

Name:	Sangeeta Sharma
Community (UN SD goal):	SDG #1 No poverty, #4 Quality Education and #13 Climate Action
Date:	05/14/2021

Project Name	Yield prediction application

Project Deliverables	
Choosing the UN goals	There are 17 UN goals and through the different website search and study, I have selected the UN goals which I think they need to be viewed and try to resolve their issues. Therefore, I got to know the UN goals for targeted community in my project. These community include those people who are living in rural areas.
Understanding the technology and tools	For building the project, the coding language need to be implemented for which I have better knowledge about language. To implement the coding, software is required and related tools to my create the user friendly interface.
Methodology	Before start creating the project coding, methodology that needs to be consider. Here, in this project, I am going to use different technique according to my requirements which will rectify the community problems aspect.
Report on Project	Project report will be made later end of the project and created in the specified format

Project Exclusions

There is no such project exclusion yet .If I raise with something, then will update it .
